IMPROVED B / CCTV PRIVACY LABEL / E

eufyCam S3 Pro

HomeBase 3 + optional eufy cloud

DATA ACCESS EXPOSURE

5 / 10

Lower = fewer scored external-access pathways

USER CONTROL

8 / 10

Higher = more documented control options

Research scores, not safety ratings. A range means evidence is incomplete; it is not a probability.

MANUFACTURER ACCESS

Support access needs your permission.

Limited, short-term troubleshooting access is described. Other access situations are outside this support statement. [P, E1]

KEY PRIVACY FACTS

Who can view?

You and people you authorise. You can remove shared access. [E1]

Video storage

HomeBase 3 local recording; cloud storage is optional. [P, E2, E3]

Encryption

Local recordings use AES encryption. Encrypted storage does not itself explain every access condition. [P, E1]

Video retention

Local history depends on capacity. Cloud history depends on the plan. [P, E2]

External processing

Some services use AWS. Voluntary video sharing for research is described. [P, E1]

Your choices

Manage shared access, delete recordings, use optional cloud, and approve support access. [P, E1]

WHY THIS RATING?

Five factors per dimension, 0-2 each. ? = not established. Rules on page 4; sources on page 5.

Support video access	1/2	Access management	2/2
Other-user access	1/2	Storage choice	2/2
Cloud recording	1/2	Deletion choice	2/2
External processing	1/2	Retention choice	1/2
Secondary video use	1/2	Data-use choice	1/2
Total	**5/10**	**Total**	**8/10**

Scope: product options shown above, not a measured household setup. Equal weights are a study design choice.

Source IDs: P, E1-E3. Ratings are researcher coding; unknowns are never scored as zero.

Ring Stick Up Cam Pro

Subscription event recording; no Ring Edge; E2EE optional

DATA ACCESS EXPOSURE

5-7 / 10

Lower = fewer scored external-access pathways

USER CONTROL

7 / 10

Higher = more documented control options

Research scores, not safety ratings. A range means evidence is incomplete; it is not a probability.

MANUFACTURER ACCESS

Support sees recordings you choose to share.

With optional E2EE enabled, Ring cannot read that encrypted video. Do not assume E2EE is on by default. [P, R3]

KEY PRIVACY FACTS

Who can view?

You and authorised Shared Users. E2EE changes sharing availability. [R1, R3]

Video storage

Recorded events use Ring cloud storage with an eligible subscription. [P, R1]

Encryption

Encrypted in transit and at rest; optional end-to-end encryption (E2EE) protects video from Ring access. [R1, R3]

Video retention

Choose an available period from 1 to 180 days. Changes apply to future recordings. [P, R2]

External processing

User-directed sharing and service-provider processing are described. Secondary-use scope needs more evidence. [P]

Your choices

Manage sharing, delete recordings, set retention and enable compatible E2EE. Some features change with E2EE. [R1-R3]

WHY THIS RATING?

Five factors per dimension, 0-2 each. ? = not established. Rules on page 4; sources on page 5.

Support video access	1/2	Access management	2/2
Other-user access	1/2	Storage choice	0/2
Cloud recording	2/2	Deletion choice	2/2
External processing	1/2	Retention choice	2/2
Secondary video use	?/2	Data-use choice	1/2
Total	**5-7/10**	**Total**	**7/10**

Scope: product options shown above, not a measured household setup. Equal weights are a study design choice.

Source IDs: P, R1-R3. Ratings are researcher coding; unknowns are never scored as zero.

IMPROVED B / CCTV PRIVACY LABEL / T

Tapo C425

microSD local + optional Tapo Care; SD encryption version-dependent

DATA ACCESS EXPOSURE

3-7 / 10

Lower = fewer scored external-access pathways

USER CONTROL

6-8 / 10

Higher = more documented control options

Research scores, not safety ratings. A range means evidence is incomplete; it is not a probability.

MANUFACTURER ACCESS

Manufacturer support access is not clearly specified.

The reviewed material does not establish the access or permission conditions. Unknown does not mean no access. [P]

KEY PRIVACY FACTS

Who can view?

You and users you authorise through device sharing. Shared access can be removed. [T4]

Video storage

Local microSD recording, with optional subscription cloud through Tapo Care. [P, T1]

Encryption

SD encryption requires supported hardware and firmware. C425 V2 is listed; check your version. [T2]

Video retention

Local history depends on card capacity. Cloud history is plan-dependent; exact duration is not fixed here. [P]

External processing

Service providers may process information. Video access and secondary-use conditions need more evidence. [P]

Your choices

Manage shared access, select local/cloud use, and format the SD card to erase all local clips. [T1, T3, T4]

WHY THIS RATING?

Five factors per dimension, 0-2 each. ? = not established. Rules on page 4; sources on page 5.

Support video access	?/2	Access management	2/2
Other-user access	1/2	Storage choice	2/2
Cloud recording	1/2	Deletion choice	1/2
External processing	1/2	Retention choice	1/2
Secondary video use	?/2	Data-use choice	?/2
Total	**3-7/10**	**Total**	**6-8/10**

Scope: product options shown above, not a measured household setup. Equal weights are a study design choice.

Source IDs: P, T1-T4. Ratings are researcher coding; unknowns are never scored as zero.

How the research ratings work

Keep this sheet available for all three labels. 请为三个品牌提供相同的说明页。

These are provisional research ratings, not manufacturer ratings, security audits or percentages. They summarise the listed product options, not the settings in your home.

Exposure measures listed routes involving other people or external services. Control measures documented choices. Both can be high at the same time. A higher control score does not cancel exposure.

Each factor uses the rules below. Add the five factors in each dimension. If a factor is unknown, show ? and report a range: known points to known points + 2 per unknown. Filled bar segments are known points; outlined segments are unknown. A range is evidence uncertainty, not a confidence interval.

Data access exposure 数据访问暴露

Factor	0 points	1 point	2 points
Support access	Explicitly blocked	User sharing or permission	Routine access without separate permission
Other-user access	Explicitly no sharing	Owner-authorised sharing	Default/broad other-user access
Cloud recording	No cloud option	Cloud optional	Cloud needed for stated recording setup
External processing	Explicitly none	Defined service processing	Broader onward use documented
Secondary video use	Explicitly excluded	Voluntary/opt-in reuse	Routine reuse without separate opt-in

User control 用户控制

Factor	0 points	1 point	2 points
Access	Explicitly unavailable	Limited management	Add and remove shared users
Storage	Cloud-only stated setup	Limited location option	Local recording + optional cloud
Deletion	Explicitly unavailable	Bulk erase only confirmed	Individual recordings can be deleted
Retention	Explicitly no choice	Capacity/plan-based history	Selectable storage period in days
Data use	Explicitly no choice	Some consent options documented	Support, research and analytics choices all documented

For every factor: use ? when the reviewed evidence cannot establish a category. A 1 for control may mean only limited options are documented, not that all other options are impossible. Do not rank overall privacy from these scores.

Evidence behind the labels

Source IDs connect facts to their basis. 来源编号用于查找事实依据。

P Project parameter table

Parameter.docx supplied by the researcher. Baseline product scope; unresolved points remain marked ?.

E1 eufy Privacy Commitment

Support permission, shared-user controls, local encryption and voluntary research sharing. General eufy policy.

E2 eufyCam S3 Pro storage duration

Model-specific HomeBase storage context.

E3 eufyCam S3 Pro cloud support

Confirms optional cloud recording support.

R1 Ring Privacy

Encryption, shared users, deletion and sharing. General service policy.

R2 Ring Video Storage Time

Selectable event-video retention; regional plan conditions apply.

R3 Ring Video E2EE

Optional E2EE and feature restrictions; use a compatible device configuration.

T1 Tapo C425 Australia product page

Local microSD and optional subscription cloud storage.

T2 TP-Link SD Card Encryption FAQ

C425 V2 is listed; hardware and firmware compatibility matter.

T3 Tapo SD Card Format Guide

Formatting removes the card contents; individual clip deletion is not assumed.

T4 TP-Link Device Sharing

Adding and removing shared access; rollout and permissions can vary.

Official pages reviewed 21 Sep 2026. Sources span AU, UK and US/global documentation. This is a research information set, not a single-market certification. Exact hardware, firmware, plan and regional defaults must be checked for a deployed product. Support-access statements do not cover all legal or exceptional access situations.
